

## HARFORD COMMUNITY COLLEGE CERTIFICATION OF LEARNING DISABILITIES

The student named below has applied for services from Harford Community College's Disability Support Services Office. In order to be able to determine eligibility and what, if any accommodations are warranted, documentation or additional documentation is needed.

Under the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973, individuals with disabilities are protected from discrimination and may be entitled to reasonable accommodations. To establish that an individual is covered under the law, documentation must indicate that a specific disability exists and that the identified disability limits one or more major life activities (e.g. learning). *A diagnosis of a disorder in and of itself does not automatically qualify an individual for accommodations.* The documentation must also support the request for accommodations and explain how the disability impacts learning.

Please complete the form and return by mail or fax to:

Harford Community College  
Disability Support Services  
401 Thomas Run Road  
Bel Air, Maryland 21015  
Attn: \_\_\_\_\_

## DIAGNOSIS:

Date of Diagnosis: \_\_\_\_\_

Date First Seen: \_\_\_\_\_

Date Last Seen: \_\_\_\_\_

***Please complete this form and attach it to documentation that follows the subsequent guidelines.***

The below guidelines have been prepared to assist you in completing documentation of Learning Disabilities. Please follow them carefully. Documentation that does not include the below listed elements will not be accepted.

- 1) The evaluation must be performed by a professional who is certified or licensed in the area of adults with learning disabilities (e.g., School Psychologist, Educational Diagnostician or Psychologist). In addition, the report must be printed on professional stationery and a signature from the professional must be included at the end of the documentation.
- 2) A clinical diagnosis is not synonymous with a disability. The documentation must include the student's specific current functional impairment(s) and describe how the condition substantially limits a major life activity in order for Harford Community College to fully evaluate the necessity for any of the following: academic adjustments, auxiliary aids, and/or auxiliary services.
- 3) Information from diagnostic interview: history of presenting symptoms, developmental history, family history, psychosocial history, academic history, prior psycho-educational test reports and history of academic adjustments.
- 4) Testing Criteria:
  - a. Individuals who are 17 years of age or older must be tested with diagnostic instruments normed for adults.
  - b. Evaluation of intelligence (IQ) must contain the full battery or series of tests. Example of acceptable instruments in current versions: Wechsler Adult Intelligence Scale, Stanford-Binet, Kaufmann Intelligence Scales.
  - c. Academic Achievement and Cognitive Processing tests are required. Examples of acceptable achievement tests: Woodcock-Johnson Psycho-educational Battery, Tests of Achievement and Cognitive Functioning; The Wechsler Individual Achievement Test, Wechsler Memory Scales.
  - d. Test results must be stated in percentile and standard score form.
  - e. Record behavioral observations that took place during the testing process.
- 5) Write a narrative of test results. Please state specific cognitive processing strengths, weaknesses, and deficits. Please discuss the following processing areas:
  - a. Visual spatial abilities
  - b. Memory (auditory and visual; short-term and long-term)
  - c. Fine motor/dexterity (speed/sequence of motor patterns)
  - d. Executive functions (verbal and nonverbal reasoning)
  - e. Selective attention/perception (auditory and visual)
  - f. A well-written interpretative summary based on a comprehensive evaluative process is required.

- 6) If oral language skills are assessed please discuss formal instruments or informal analysis of language sample used.
- 7) Social-emotional assessment is required in order to rule out a primary emotional basis for learning difficulties. Social-emotional status should be assessed and discussed. Formal assessment instruments and/or clinical interview are appropriate. If applicable, a mental health diagnosis should be clearly stated.
- 8) Conclusion – includes a brief summary of test results, background history and test observations. This section must also include an eligibility statement using clear definitive language. The statement that identifies a specific learning disability either meets DSM-IV criteria of federal special education standards. The conclusion should clearly explain how the condition causes significant impairment in one or more major life activity. It should also include a detailed explanation of how the disorder limits the student’s functioning in an educational setting for learning or taking tests.
- 9) The recommendation section should include recommendations for accommodations in an educational setting (e.g., extended time because of focusing difficulties, etc.) and indicate the reason these accommodations are warranted if the current treatments are successful. It is helpful if accommodations and strategies are logically related to functional limitations. If connections are not obvious, a clear explanation of their relationship would be helpful.
